Live Green Buy Green Recycle Responsibly

Energy efficiency through improved design!

Earth's natural renewable and non-renewable resources are needed to create the products we use every day.

We help protect the Earth's systems when we recycle these products responsibly.

In today's digital age, being green means:

- **Live Green!** Be efficient with your energy use and unplug chargers and devices when they are not in use.
- **Buy Green!** Buy refurbished products and ENERGY STAR® products. The ENERGY STAR label means the product is designed for efficiency.
- **Recycle Responsibly!** Visit GreenerGadgets.org to find a responsible e-waste recycling center near you. Recycle packaging at curbside or at a local recycling center.

Sign up now to take the pledge to Live Green – Buy Green – Recycle Responsibly!
