WE NEED TREES

Part 1: Trees provide food and shelter. In the first column, name some fruits and nuts that trees produce. In the second column, name all the animals you can think of that live in or near trees. How many can you come up with?

Fruits and Nuts That Trees Produce	Animals That Live in Trees

Part 2: The mayor of your town just won a grant to fix up the town's park. But the city council is divided on how to spend the money. Some want more parking spaces. Others want more trees. The mayor is asking the townspeople to choose what they prefer. Use what you've learned about the benefits of trees to write a letter designed to persuade the mayor to use the money to plant trees in the park.

Dear Mayor Jones:

Families: Go on a nature hunt! Take a "tree walk" to identify leaves, nuts, or fruit from trees in your neighborhood and then make a nature collage out of what you find.
