

# MARINE ANIMALS AROUND THE WORLD

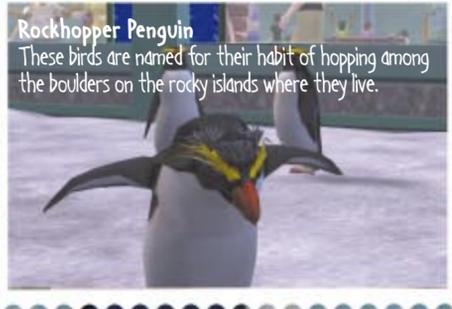

**Black Tip Reef Shark**  
These sharks mainly eat fish, but they also have been known to eat snakes!

**Bottlenose Dolphin**  
Bottlenose Dolphins are named for the shape of their snout.

**Manta Ray**  
This fish can grow up to 23 feet from tip to tip, but it's harmless to humans.

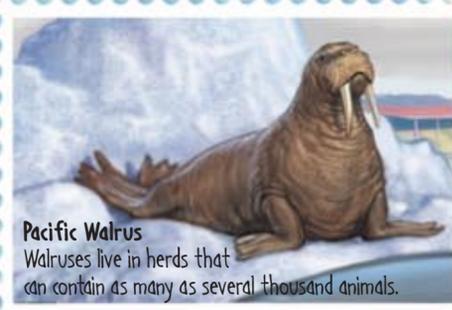

**Rockhopper Penguin**  
These birds are named for their habit of hopping among the boulders on the rocky islands where they live.

**Orca (Killer Whale)**  
Orcas live in more parts of the world than any other aquatic mammal.

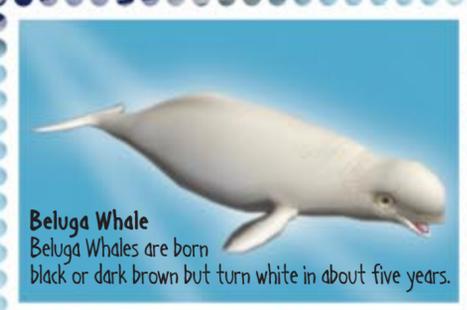

**Green Sea Turtle**  
The shell is brown, but this turtle's fat is green!

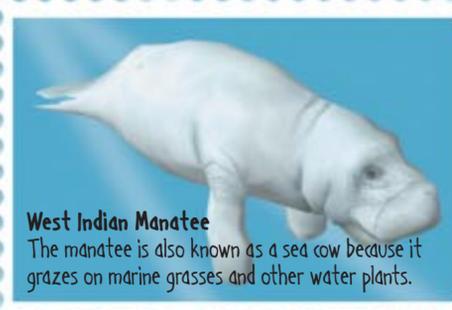

**Pacific Walrus**  
Walruses live in herds that can contain as many as several thousand animals.

**Blue Marlin**  
Blue Marlin are among the ocean's fastest swimmers due to their hydrodynamic shape and great strength.

**Beluga Whale**  
Beluga Whales are born black or dark brown but turn white in about five years.

**West Indian Manatee**  
The manatee is also known as a sea cow because it grazes on marine grasses and other water plants.
