

GRADES 6-8

REPRODUCIBLE MASTER

ACTIVITY 4 TO REBUILD OR RELOCATE?

In the film *Hurricane*, we see the tremendous damage that can be caused by such a powerful storm. We also learn that certain areas are more likely to be affected by hurricanes. Some people insist on rebuilding in the same spot where they might have experienced losses from previous storms. Why would people do this? Why not relocate to somewhere safer? Should money continue to be spent rebuilding?

In this activity, you will research and debate the question: Should communities rebuild in hurricane prone areas? Note your findings below, then list the points—both pro and con—to support or refute this idea.

Note	Source

Pro	Con
