

REMEMBER "THE OIL FACTOR"

Helpful Car Care Information from Castrol

IT'S MORE THAN JUST OIL. IT'S LIQUID ENGINEERING.™

WHICH CASTROL BRAND IS RIGHT FOR YOUR KIND OF DRIVING?

Proper lubrication is the key to maintaining and protecting your car's engine.

Keep this brochure handy as an easy reference when having your motor oil changed or when buying oil for your car.

Castrol GTX

Designed to provide superior protection against sludge build-up.*

- Formulated with unique dispersants to provide superior sludge protection among leading oils
- Passed one of the industry's toughest sludge standards**
- Provides the highest North American standard of protection against viscosity breakdown
- Delivers unsurpassed protection against thermal breakdown

CONVENTIONAL

*Among leading motor oils.

** In 5W-30 and 10W-30 grades.

Castrol GTX HIGH MILEAGE

Designed to help extend the life of your engine.

- Specially formulated for vehicles with over 75,000 miles
- Provides superior protection against oil burn-off as compared to leading oils
- Contains seal conditioners to help reduce oil leakage

HIGH MILEAGE

Castrol SYNTEC BLEND

Designed to provide added protection for frequent short trips.

- Provides superior protection against the 'wear and tear' of short trip driving
- Offers superior viscosity and wear protection
- Combats volatility and harmful deposits
- Contains an added level of synthetic protection

SYNTHETIC BLEND

Castrol SYNTEC

Designed to help maintain maximum horsepower by reducing harmful deposit formation.

- No leading motor oil provides more horsepower†
- Provides stability and endurance under extreme conditions like heat, load, and speed
- Superior engine protection that outperforms leading conventional and synthetic blend oils, passing severe industry tests

SYNTHETIC

† Castrol SYNTEC 10W-30 tested vs. leading 10W-30s.

A MESSAGE FOR STUDENTS

If motors are your motivation, you could be a Castrol SYNTEC Outperformer! The Castrol SYNTEC Outperformers Program rewards aspiring young auto technicians with a \$7,500 scholarship to attend an automotive program, technical institute, or other school approved by BP Lubricants USA Inc. Starting on November 1, 2006, Castrol asks would-be auto technicians ages 16-25 to explain, in 500 words or less, why they should win the 2007 Castrol SYNTEC Outperformers scholarship. **For complete program details and to submit entries, please visit www.syntecoutperformers.com.**

A Change for the Better

If you're a do-it-yourselfer, remember to discard used motor oil properly.* Oil poured down a drain or sewer can pollute rivers and streams and even contaminate ground water. Take your used oil to a certified oil recycling center instead. To find a center near you, visit www.earth911.org on the Internet.

*Safety Note: Used oil is hazardous. Avoid prolonged contact. Wash skin thoroughly with soap and water after contact and launder or discard soiled clothes. Impermeable gloves and eye protection are recommended.
