SUPER SMART SMILES

Part A.

What does your smile say about you? Let's learn how to keep those smiles coming!

This diagram shows the types of permanent teeth. Draw a star on the teeth that you have, and put an X on the teeth that haven't grown in yet.

Each tooth has a special job. Draw a line to match the tooth type to its purpose.

Tooth Type	Purpose
1. Bicuspids	a. Sharp, chisel-like shapes help cut and bite into food
2. Incisors	b. Flat surface to help crush and tear food
3. Cuspids	c. Bumpy surface helps grind food
4. Molars	d. Resemble fangs and help tear food

Unscramble these super smart steps to care for your teeth.

1. **nsrie** _____ with fluoride to help prevent cavities, strengthen teeth, and remove particles brushing may miss.
2. **hurbs** _____ with a kid-sized toothbrush like REACH® WONDER GRIP®.
3. **sflos** _____ to reach in between teeth where the toothbrush can't.

Part B.

Let's write a song called *Brush to the Rhythm*. Read the three words to use in your song. Then add your own!

brush, floss, rinse, _____,

_____, _____

What favorite tune do you want to use? Write the name of the song here.

Now, be a rock star. Use your word list and your favorite tune to write your own *Brush to the Rhythm* song or rap. Sing it when you brush your teeth at home. Sing it for your friends!

Brush Up on Dental Health

- Always use an anticavity fluoride rinse after brushing to protect against cavities and strengthen teeth. LISTERINE® SMART RINSE® provides 12-hour cavity protection and makes teeth over 50% stronger than brushing alone.
- Don't forget to get a new toothbrush like the REACH® BATMAN™ or REACH® WONDER GRIP® toothbrush every three months or after you have been sick with a cold or flu.
