Activity 5: Penguin World

This is what the world might look like if you were a penguin.

This map shows the Earth's southern hemisphere, with Antarctica—the South Pole—in the center, surrounded by Australia and the southern parts of South America and Africa. About 17 different kinds of penguins live throughout this region.

Read about the eight kinds of penguins described here, including the King Penguins that live on South Georgia Island. Use the map to match each penguin to the letter that shows its home. Then make a bar graph on the back of this sheet that shows how tall each type of penguin is.

Use your mapping answers and your bar graph to answer the questions below.

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.

- | | | | |
|--------|----------------------------|-------------------|---|
| ___ 1. | African Penguin | Height: 27 inches | Home: The southern tip of Africa |
| ___ 2. | Chinstrap Penguin | Height: 30 inches | Home: South Georgia Island and the Antarctic region |
| ___ 3. | Emperor Penguin | Height: 44 inches | Home: Antarctica |
| ___ 4. | Gentoo Penguin | Height: 35 inches | Home: South Georgia Island and the Antarctic region |
| ___ 5. | Humboldt Penguin | Height: 24 inches | Home: Chile and Peru in South America |
| ___ 6. | King Penguin | Height: 37 inches | Home: South Georgia Island and the Antarctic region |
| ___ 7. | Little Blue Penguin | Height: 12 inches | Home: Australia and New Zealand |
| ___ 8. | Macaroni Penguin | Height: 28 inches | Home: South Georgia Island and the Antarctic region |
