

# Make an Escape Plan!

You need to get out fast when you hear a smoke alarm. That's why you need a home fire escape plan. Start planning now! Look at these pictures. Can you find two ways out of each room? One way out could be through a doorway. Another way out could be through a window. Write a "1" on your first way out and a "2" on your second way out.

Now work with a grown-up to find two ways out of every room in your home. Ask your grown-up to draw a map of your escape plan, like the map shown here. Then decide on a meeting place where everyone will go when they get outside. Take or draw a picture of your family meeting place to share in class.

2<sup>ND</sup> ESCAPE PATH →

**A Message to Parents and Guardians:** Practice your escape plan with a home fire drill at least twice a year. Make sure everyone can get out in less than two minutes!
