

**Empower your  
students to chart  
their financial  
paths with  
confidence**

**About  
The Actuarial  
Foundation's  
Money Mentors  
Program:**

**At Money Mentors we empower young people to make conscious choices about their resources, time, and energy.**

**We focus on the basics of thinking about money coming in and money going out, and we avoid getting bogged down in details that aren't relevant or practical. We strive for growth and discovery.**

**All course materials are provided by Money Mentors. Our tutors must pass a background check to volunteer and are trained and supported by our team of educators at every step of the way.**

**Modules focus on finance basics, planning ahead with credit, and saving and investing.**

A Program of The Actuarial Foundation

**Money  
Mentors**

**"We should do this more frequently and for other schools as well because I feel like the material was super useful for students, and the feedback from the students was that these were the kinds of things they had been hoping to learn. Overall, really great experience and hoping to do another one soon!"**

**— Rachel M., Chicago, IL Financial Literacy Mentor**
