

The goal of our program is to foster a mentor relationship with students around the nation, facilitating discussions around finances to empower young people to make conscious choices about their money. We focus on the basics of thinking about money coming in and money going out, and our aim is to avoid getting bogged down in details that overly complicate the topics. We are striving to help students think well about their resources (including their time and energy) and to adopt a mindset of learning where mistakes are okay, and every juncture is an opportunity to reflect and grow.

Week	Lesson Topic	Lesson Content	Additional Activities
One	Spending Plans and Finance Fundamentals	Income and expenses, needs vs. wants	Money Magic video game (NGPF)
