

Interactive Trivia Game Instructions

1. Before starting this game, review the classroom poster to teach students about the *Drug Facts* label.
2. Explain that students will be playing a trivia game that will test their overall knowledge of medicine safety. Divide the students into two (or more) teams.
3. Project the game onto your whiteboard, review the on-screen directions and the categories, then explain the rules of play. (*See the next page for play options if you do not have a whiteboard.*)
 - Determine who will be the moderator and read the clues and keep score — it might be you or a student.
 - A student from Team 1 will choose a category and the moderator will read the first question (in the form of an answer) from the selected column.
 - The student can confer with their teammates before giving their answer in the form of a question.
 - If the student gives the correct answer, the team earns the corresponding points and the next person on their team picks another question to answer.
 - If the student gets the answer wrong, the first student on the next team gets a chance to answer. If they answer correctly, the team earns the corresponding points and the next student on their team picks another question to answer.
 - If no team answers correctly, the moderator gives the correct answer. The next team then picks another question to answer.
 - The game ends when all questions have been successfully answered. The team with the most points wins.
4. On-screen directions:

Are you ready to show your OTC medicine safety smarts?

 1. Check out the four categories on the board.
 2. Click a category value — for example, *Drug Facts Label for 200* — to reveal an **answer**.
 3. Think of the **question** that matches this answer. Get ready to show what you know!
 4. If you are correct, your team gets to choose again. The board is yours! What will you choose next?

How to Play Offline

If you do not have a whiteboard, you can write the question categories into a gameboard grid on your chalkboard or chart paper, such as the image below. Then follow the game-play instructions above, except that as teams choose their categories, the moderator reads the **answers** shown below. The matching **question** the player should provide is provided below the answer.

Over-the-Counter (OTC) or Prescription (Rx)?	The <i>Drug Facts</i> Label	Medicine Tools and Storage	Understanding Safe Medicine Use
100	100	100	100
200	200	200	200
300	300	300	300
400	400	400	400
500	500	500	500

Directions

Read the following directions to the players:

Are you ready to show your OTC safety smarts?

1. Check out the four categories on the board.
2. Select a category and value — for example, *Drug Facts* Label for 200. to reveal an **answer**.
3. Think of the **question** that matches this answer. Get ready to show what you know!
4. If you are correct, your team gets to choose again. The board is yours! What will you choose next?
