

PLAY SAFE!

Keep Vaccinations Up to Date for Everyone in Your Family

Vaccines are one of the best ways to help protect infants and young children from vaccine-preventable diseases. To help keep your family healthy:

- **KNOW** the vaccine schedule for your child and all family members.
- **KEEP EVERYONE** in your family up to date on recommended vaccinations.
- **REMEMBER:** When your whole family is vaccinated – including children, parents, grandparents, and caregivers – it helps lower the risk of potentially life-threatening diseases like whooping cough, flu, and COVID-19.
