

SUN SAFETY FOR ALL

PROTECT YOUR SKIN FROM THE SUN ALL YEAR

Dear Principals and School Nurses,

We are thrilled to introduce *Sun Safety for All*, a free program from Neutrogena® SkinU and Young Minds Inspired (YMI) designed to educate students about the importance of sun safety.

Sun Safety for All features classroom activities for grades 3-8, which align with health, STEM, and Common Core ELA standards, as well as a take-home letter for parents and caregivers with tips to help them protect their families from the sun's harmful UV rays. We encourage you to share this valuable program with your teachers and staff. Please visit

www.ymiclassroom.com/suncare to learn more and download the materials.

As you may know, many states now have laws allowing students to use sunscreen at school, without a physician's note or prescription, to help protect them from the dangers of UV exposure. To learn more about this legislation in your state, please visit www.asds.net/asdsa-advocacy/positions-model-legislation/model-legislation/sunucate/state-legislation and/or speak with your school district leaders for guidelines.

Here's to keeping children sun-safe!

Your Friends at YMI

Why is sun safety important for your students?

Just one blistering sunburn at a young age can double the chance of developing melanoma — the deadliest form of skin cancer — later in life.

Skin cancer is the most common and preventable cancer in the United States. Educating students on how to protect themselves from harmful UV rays is essential for their long-term health. Learn more at www.ymiclassroom.com/suncare.
